

LOW VOLUME INSERT

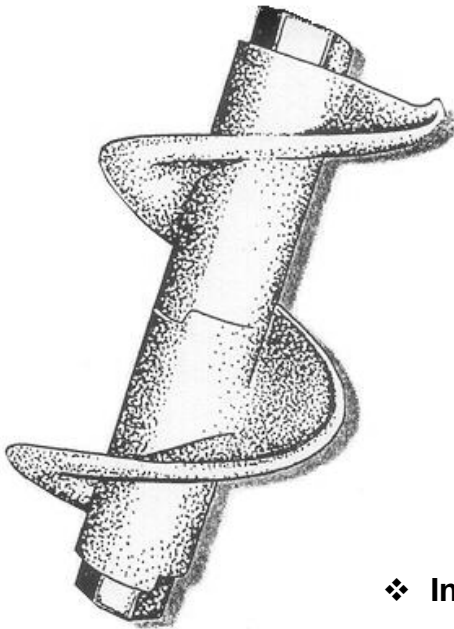

The low volume insert is used when applying seed (canola, sunflowers) at very low rates. The insert holds from 15 to 18 fifty-pound bags of seed. With the insert installed, seed is confined to the area directly above the meter. By creating a smaller compartment for seed, the operator can monitor seed usage more accurately.

Fargo Aire:	<u>Order #</u>	<u>Price</u>
Model 2800	66549	\$310.00
Model 3350	66550	\$330.00

REPLACEMENT POLY / CUPPED AUGER FLIGHTING

(For the gentle handling of bulk seed)

<u>Order #</u>		<u>Complete Sections</u>	<u>Replacement Auger</u>
34186	7" x 18'	N/A	\$14.25
65903	8" x 18'	\$845.00	\$13.90
66104	10" x 21'	\$1,210.00	\$19.95

- ❖ Works very well with abrasive granular fertilizers.
- ❖ High density polyethylene (gentle on seed yet tough and long wearing)
- ❖ Increases auguring capacity and runs with much less noise
