

# VERTICAL TILLAGE COULTERS

## High speed light tillage, residue sizing and field leveling system

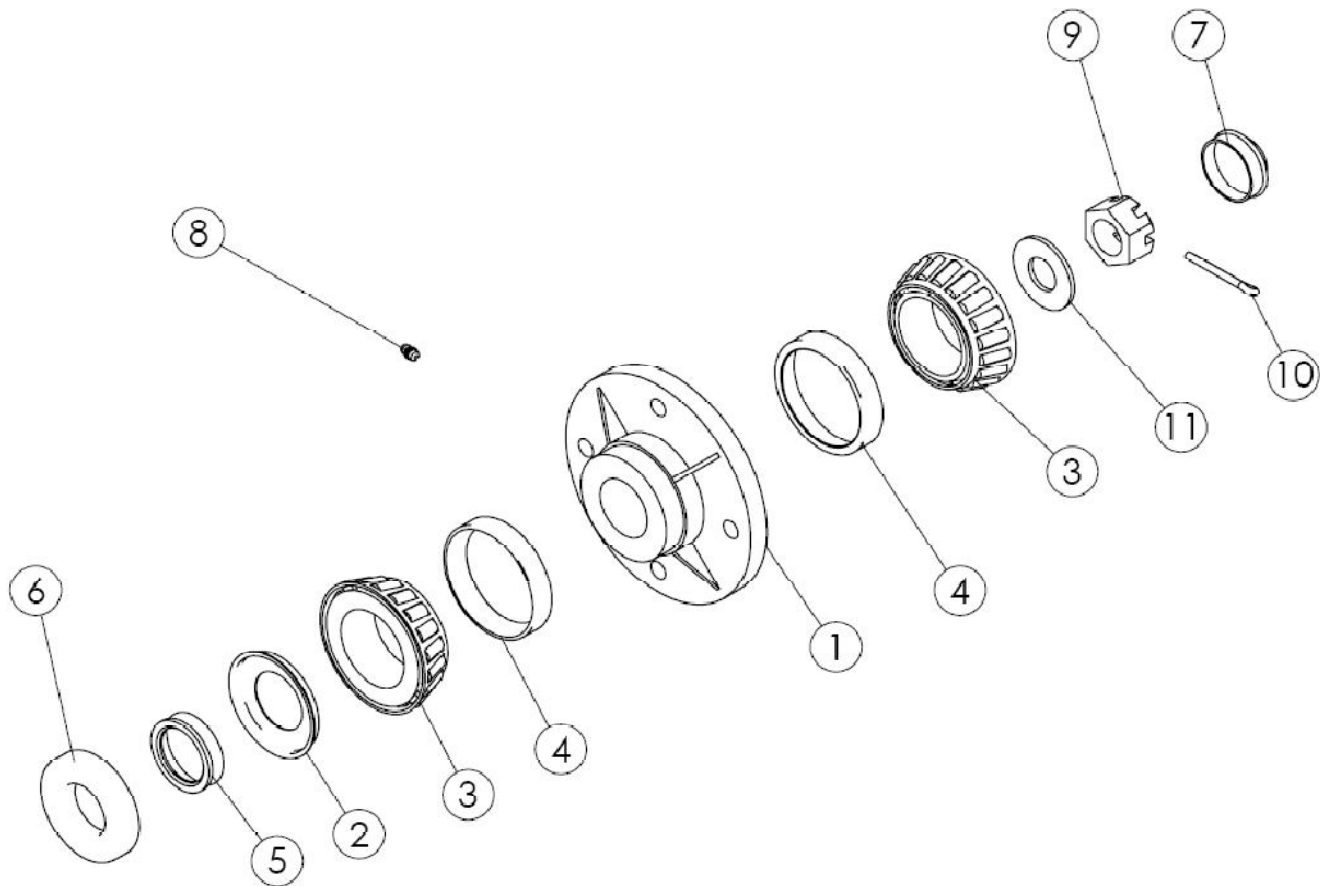

### Advantages of vertical tillage coulters

- Excellent spring seedbed preparation
- Cover acres quickly
- Does not establish a soil compaction layer like most other tillage systems
- Does not bring corn root residue to the surface
- Get in the field earlier in the spring
- Does not dry soils like other more aggressive tillage systems
- Make almost any chisel plow with a 50° shank a vertical tillage system
